Veterinarian Shortage Situation Nomination Form

To be completed by the chief State or Insular Area Animal Health Official or his/her designee

Veterinary Medicine Loan Repayment Program (VMLRP)

Nomination of Veterinarian Shortage Situations for the Veterinary Medicine Loan Repayment Program (VMLRP) Authorized Under the National Veterinary Medical Service Act (NVMSA)

Note: Please submit one separate nomination form for each position. See solicitation for number of nominations permitted for your state or insular area.

Veterinary Shortage ID Code: OK115

Location of Veterinary Shortage Area for this Nomination

Note: If this nomination is for a public practice position, please provide the location of the home office or the center of service area.

Roger Mills and Dewey Counties, Oklahoma

Location of Veterinary Shortage:

(e.g., County, State/Insular Area)

Center of Service Area or

Cheyenne, Roger Mills County and Taloga, Dewey County

Location of Position:

(e.g., Address or Cross Street, Town/City, and Zip Code)

Type of Veterinary Practice Area/Discipline/Specialty

☒ Type I Shortage: Private Practice

Food Animal Medicine (at least 80 percent time)

Please select **one or more** specialties requested for this position:

- | | |
|-------------------------------------|----------------|
| <input checked="" type="checkbox"/> | Beef Cattle |
| <input type="checkbox"/> | Dairy Cattle |
| <input type="checkbox"/> | Swine |
| <input type="checkbox"/> | Poultry |
| <input type="checkbox"/> | Small Ruminant |
| <input type="checkbox"/> | Other _____ |

☐ Type II Shortage: Private Practice – Rural Area

Food Animal Medicine (at least 30 percent time)

Please select **one or more** specialties requested for this position:

- | | |
|--------------------------|----------------|
| <input type="checkbox"/> | Beef Cattle |
| <input type="checkbox"/> | Dairy Cattle |
| <input type="checkbox"/> | Swine |
| <input type="checkbox"/> | Poultry |
| <input type="checkbox"/> | Small Ruminant |
| <input type="checkbox"/> | Other : _____ |

☐ Type III Shortage: Public Practice (at least 49 percent time*)

Employer: _____ Position Title: _____

Please select **one or more** specialty/disciplinary areas.

- | | |
|--------------------------|---------------|
| <input type="checkbox"/> | Food Safety |
| <input type="checkbox"/> | Public Health |
| <input type="checkbox"/> | Epidemiology |
| <input type="checkbox"/> | Other: _____ |

Please describe the objectives of a veterinarian meeting this shortage situation as well as being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

(Statistics used in all responses within this document courtesy of NASS 2007 Census of Agriculture and the Oklahoma Board of Veterinary Medical Examiners.)

In assessing the overall need for food and fiber veterinarians in Oklahoma, it has become apparent that there are many counties, regions and practice types that should be considered as areas of critical need. Dewey and Roger Mills Counties in West Central Oklahoma have mainly beef cow stoker and cow calf operations. There is a small but productive dairy segment as well. There is only one practicing veterinarian in each county. There are 998 farms/ranches with 115,000 head of cattle. Due to the size of these counties, the number of livestock and the lack of any town of significant size, this is a Type I critical need. The objective for these counties is to meet the need of cattle, raising stakeholders and to offer vital and needed relief to the two small practices currently working to meet this need. The State of Oklahoma would expect a veterinarian meeting this shortage situation to devote 80% or greater of his or her time in the practice of food animal medicine.

Please describe the activities of a veterinarian meeting this shortage situation and being located in the community, area, state/insular area, or position requested above (limit your response to 200 words or less).

The principle day-to-day professional activities expected of a veterinarian meeting the needs of this two county area shall focus on beef cattle, to include; ambulatory as well a clinical services, herd health, obstetrics, nutrition, client education, diagnostics, preventative health care, surgery, breeding management, foreign animal disease recognition, antimicrobial use education and tissue residue prevention education. This veterinarian shall comply with the Oklahoma Practice Act, be accredited with USDA APHIS Veterinary Services, adhere to the statues and rules of the of the State of Oklahoma covering disease and animal movement and work with the State Veterinarian to insure the health of the herd and flock of the State of Oklahoma. It is paramount for the safety of the food supply, the health of the meat and fiber national and international markets and the health and safety of the American consuming public that veterinarians dedicated and versed in veterinary medicine, foreign animal disease, zoonotic disease and appropriate use of antimicrobials are available in this area of our state.

Please describe any past efforts to recruit and retain a veterinarian in the shortage situation identified above (limit your response to 100 words or less).

The principle day-to-day professional activities expected of a veterinarian meeting the needs of this two county area shall focus on beef cattle, to include; ambulatory as well a clinical services, herd health, obstetrics, nutrition, client education, diagnostics, preventative health care, surgery, breeding management, foreign animal disease recognition, antimicrobial use education and tissue residue prevention education. This veterinarian shall comply with the Oklahoma Practice Act, be accredited with USDA APHIS Veterinary Services, adhere to the statues and rules of the of the State of Oklahoma covering disease and animal movement and work with the State Veterinarian to insure the health of the herd and flock of the State of Oklahoma. It is paramount for the safety of the food supply, the health of the meat and fiber national and international markets and the health and safety of the American consuming public that veterinarians dedicated and versed in veterinary medicine, foreign animal disease, zoonotic disease and appropriate use of antimicrobials are available in this area of our state.

Please describe the risk of this veterinarian position not being secured or retained. Include the risk(s) to the production of a safe and wholesome food supply and to animal, human, and environmental health not only in the community but in the region, state/insular area, nation, and/or international community (limit your response to 250 words or less).

The consequences of not filling this critical need are many and varied. First and foremost is the protection of the food supply and the cost to consumers in the event of a Foreign Animal Disease outbreak or a food borne pathogen event. Animal health begins on the farm and ranch, food safety begins on the farm and ranch. In the U.S., we must take a farm to fork approach to a safe and abundant food supply. This grass roots approach puts the food animal practitioner in a pivotal and critical roll in education, disease recognition, disease mitigation and foreign animal disease reporting. We need and we must have educated, excited and dedicated veterinarians on the ground in areas of animal agriculture And without this program that will not happen in remote and critical deficit counties, regions, and states. Second, we fear that we will see a decrease in food and fiber animal production when we cannot meet the veterinary needs of stakeholders.

Please indicate whether you consider this situation/position a candidate for a "service in emergency" agreement (limit your response to 100 words or less). Please see solicitations for additional information regarding the obligation of participants who enter into the "Service in Emergency" agreement.

Authorized State or Insular Area Animal Health Official or designee:

Name: Becky L. Brewer-Walker

Title: Oklahoma State Veterinarian

Organization: Oklahoma Dept. of Agriculture, Food and Forestry
